

THE LAST EBOOK YOU WILL EVER NEED TO READ

ABOUT HOW TO MAKE MONEY ONLINE

Or... The Beginning

Introduction

First of all, let me thank you for downloading this free ebook. The reason for giving it away is that it doesn't contain any information worth to sell, though you will thank yourself after taking the time - about three minutes- to read it.

The reason behind creating this report, or simply, what I really want is that you realize what you are doing wrong and start making money just as the real successful internet marketers from whom you get dozens of emails every single day. I will neither be sharing any magic tricks nor any killer strategies claiming that you will make up to \$1,000 today. In fact, you can, even if you are a complete beginner and even if this is the first thing you are reading about internet marketing. However, for me, the chance of a complete newbie to make \$1000 the first day, is less than winning the lottery on first try.

This report is not about that. This report is not about "how to make money online". This report is not about "7 long hidden secrets of super affiliates that pull millions each year". And lastly, this report is not about "the easiest way to make money online that will work like a charm, designed just for you".

The only motivation of this report is to be the last ebook you will actually need to read before you start to make money online. I just want to take your attention into an obvious truth about yourself. There are **3 messages** in this book which may or may not make you jump over your seat, however if you listen to them and do as what they say, there is so little chance of you to continue your life as a zero-earning-internet-marketer. So, I can not mention enough the importance of those messages. Only you have the freedom to take your chance and do as what the messages suggest.

I hope this report happens to be the last one you read before realizing what you have to do to make money online and it pushes you to take action. Now, enough talking. Go to the next page to see the first message this report tends to deliver.

Message #1:

“STOP READING!!!”

.
. .
.

“START WRITING!!!”

O.K., if that message didn't help you, go on to the second one.

Message #2:

“STOP READING!!!”

·
·
·

“START WRITING!!!”

I guess message #2 didn't help you break your chains either, so, go on reading...

The Message 3:

“STOP READING!!!”

·
·
·

“START WRITING!!!”

So, why do you insist on reading? Why didn't you take some action about what you read before this ebook? Do not wait for a miracle, because it will not happen.

Your comments and ideas are most welcome.
